TOBACCO GUMS!

If you expect to use any Tobacco Gums this year I would like to quote you prices on the LATEST IMPROVED ones on the MARKET. I am making them of Maple, in 9 and 12 inch sizes, but can furnish them in any size, full or scant, on short notice. I am making two kinds of

=: PATENT GUMS. :=

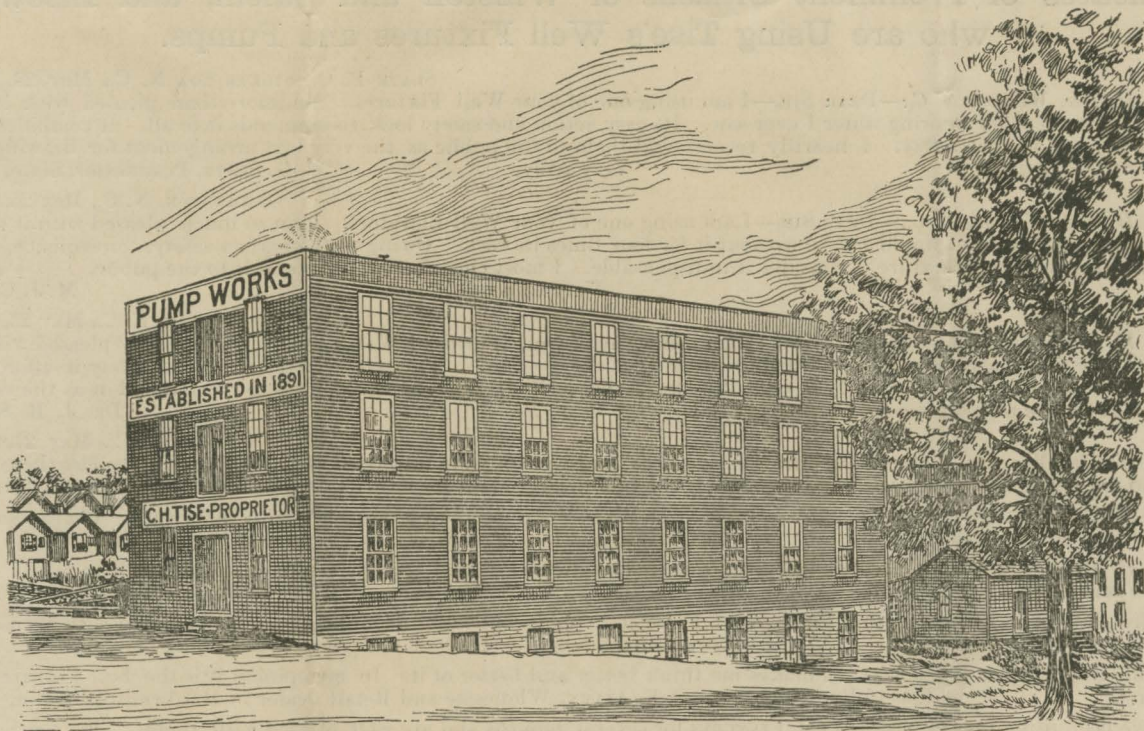

One is like cut on this circular, with three bands and two loose locks, worked with lever in one-fourth the time of old Gums, and life of Gum is two to three times as great. No hammer required for fastening lids or heads. I furnish a false head with each half dozen Gums, which does away with hammering keys.

The other Gum has two wide round and one square band extending around Gum on outside, and goes two and one-half inches under bottom, which prevents any possibility of bottom giving down. Locks are attached to lid and worked as above described. Can furnish testimonials of parties who used them last year and pronounced them perfect, and will have no other. To be convinced of their superiority over all others is to see and use one, which I would like to send subject to your approval.

Yours respectfully,

C. H. TISE,

Main Street, WINSTON, N. C.

Do You Drink Water?

If you do, call on L. W. BLACKWELL, who is in your town for a few days, and find out from him how you can GET IT EASIER, SAFER, MORE QUICKLY AND MUCH CLEARER than the way you now do. We are selling everything in

-:- WATER -:- MACHINERY, -:-

from a Flutter Mill to a Wind Mill. Nothing has been found to date that gives more universal satisfaction than the celebrated

TISE WELL FIXTURES AND PUMPS.

They are made of the best grade material, in our shops right here on your home market. We sell Pumps to please the people and not to get your money and pull for other parts. We do not ask you to buy from us because ours is a home industry but on the merit of the goods solely. When your valve wears out write to us on one train and receive valve on next, and not have to carry water from your neighbor's well, or a branch, waiting to get it from the North or West. Also note some of the following reasons, any of which we claim is enough to convince a reasonable person that we have the pump you need. It is

PERFECTLY SAFE FOR CHILDREN,

(an item worth its cost). Any child large enough to carry a bucket of water can use it with ease. Any one can repair it. Should a piece, through gross carelessness break, you can get it without having to buy a new Pump. Has a vent that prevents any risk of freezing, and can be made to do more different work than any other Force Pump made. With a piece of hose you can wash off your horse, buggy, windows, porches, sprinkle yard, garden, flowers, &c., and at the same time use it for a fire engine; though we don't sell them. It will throw water on any ordinary dwelling without hurt to Pump, if properly cared for.

If you have any of the above work to do buy a TISE PUMP, and convince yourself and your neighbors that you have not only the best Pump made but a

LABOR SAVER.

Yours to please,

C. H. TISE.
