February 25th 1932

Harris Wrench Co.,
Mount Airy, N.C.

Att. Mr. J. P. Frank, Gen. Agr.

My dear Mr. Frank:--

First, I want to thank you for the check and say I certainly appreciate it.

I wish to say to start with that it is my desire to do everything possible to make this wrench satisfactory to you, and as far as any compensation to me for my time is concerned, you can forget it.

As regards the last paragraph in your letter, don't you think you are putting too much responsibility on my shoulders, to ask me to guarantee that the new parts will be satisfactory to you in every way?

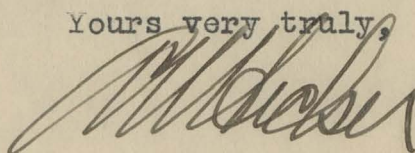

Now, I want to once more recommend to you that since a satisfactory Engineer is not easily available to you that you let me secure an Engineer; have him go into your problem; make his recommendations to both of us, and that you then authorize the making up of sample wrenches, following his recommendations, and that they then be tried out thoroly, both here and by yourself at Mount Airy, and that thru your Engineer you arrive at a definite specification.

We will then be only too glad to make up the parts and guarantee to you that they will be in accordance with that specification.

If you do not agree with me, and you still want to go along on your original basis, I will secure an Engineer, get the information and make up the parts, but I just cannot guarantee that they will be satisfactory to you in every way.

Awaiting with interest your further expression in this connection, I am

Yours very truly,

H/N

Why not
Select good steel.
Experiment with
heat treatment
if necessary.
