DESIGNED & PUBLISHED BY BUILDERS BROCHURE COMPANY, INC., 502A W. CRAIGHEAD ROAD, CHARLOTTE, N. C. 28206 1975

AN INTRODUCTION TO
JOHN S. CLARK COMPANY, INC.
MOUNT AIRY, NORTH CAROLINA

John S. Clark Company Inc. was founded in 1958 by the late John S. Clark. Mr. Clark was president of the Company until his death in 1969. Immediately after Mr. Clark's passing, C. Richard Vaughn, an officer of John S. Clark Company, Inc., entered into a purchase agreement with the Clark interests. Richard Vaughn is now President & General Manager of the firm. Richard was educated at North Carolina State College, where he graduated with a B.S. Degree in Nuclear Engineering.

The Company is well staffed with management personnel having three graduate engineers with a combined experience in building construction of more than thirty years. With this experience and "know how", we can offer "turn key" construction in Commercial, Industrial, Institutional, single and multi-family residential-type buildings featuring conventional and pre-engineered construction.

Jerry G. Coram became associated with the Company in 1969. Jerry is Vice-President Operations. He was educated at North Carolina State College, where he graduated in Civil Engineering in 1960. He is also a Professional Engineer, licensed in North Carolina.

William I. Mickey is manager of the Pre-engineered Building Division, primarily involved with sales and estimating. Bill graduated from North Carolina State University in 1965 with a B.S. in Civil Engineering. He received his Masters Degree in Business Administration from Emory University in 1967.

Morriss A. Pendleton has been associated with the Company for six years. After having come up through the ranks, he has been working as a Project Manager for three years. Morriss has had experience in all aspects of the business, including estimating, drafting, engineering and project management.

The Company is financially strong with unlimited licenses in North Carolina and Virginia. We are capable of bonding any project which we feel that our resources would allow us to accomplish. Our business has been built around quality work and timely service. We feel that any of our clients will recommend us as a contractor with integrity, skill and responsibility. We pride ourselves as having built an organization around repeat business.

Our gallery of buildings completed includes all sizes and types. During the past year, we have completed over one million square feet of floor space including one building containing 540,000 square feet. Types of construction have been varied, utilizing virtually every system used in the industry.

Normally, we have approximately 100 skilled employees on our payroll. These men are backed by proficient foremen and superintendents. The quality and quantity of our equipment to back our forces is unequalled for a company our size.

John S. Clark Company, Inc. has been a member of the Associated General Contractors for many years. We support its principals and participate in its programs.
