

Max Meador Jr.

Jan'y 11th 1901

Mr. R. L. Lwyn

Mount Airy N. C.

Dear Richard:

Your favor of 8th inst. received.

You are in a position to know more about what to do with the landed property you speak of than ~~possibly~~ could be expected of us. and if you can get the price (or near it) per acre for the merchantable Lumber (\$3.) I would think you would do well to let it go — especially as you seem to think there would be no difficulty in getting \$3. per acre for the Land. Timbered Land over here in that

is wild land, is hard to dispose of at any price after it is stripped of its timber.

From what you say I suppose this is the best opportunity you have ever had of selling.

We are all well

We hope for may get better of his rheumatism. Write us letting us know how he gets on. Mrs Tate, as you doubtless have heard, has Typhoid Fever. I have been out there. Her situation was a little dangerous about 12 days ago: but she has been improving since then. She has every attention. We heard from her yesterday (10th) & she still improves & prospects are now all favorable for her speedy recovery. I was also to see Hugh. He was complaining some of cold. I suppose he is well by this time. Ride over to see us if

none of the others can at present come.
We would like to see you. Hope
the children can get over to see
us after the winter.

Hoping you a happy new year &
with love to all.

I am ever yours
C. B. Graham
