

1888

# New Hocking Valley Pattern

1888

## Right Hand One Hole Sheller.

Cold Rolled Steel Shafts, with Solid Chilled Collars, same pattern as our VIGILANT, shown on opposite side.

Separates Corn from the Cob.

WITH OR WITHOUT FAN ATTACHMENT.

Largest, best constructed and finished One Hole Sheller of the attractive and popular pattern, shown in illustration, except our Shenandoah Valley. Embodying all the qualities of a perfect machine. Frame of Hard Wood, Handsomely Striped and Finished and Secured with Joint Bolts.

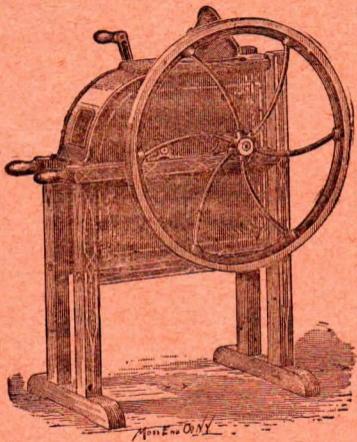

Capacity, twenty to twenty-five bushels per hour.

Price without Fan \$8.25.

Price with Fan, \$9.10.

Price with Fan and Feed Table, \$9.60.

Manufactured by S. R. WHITE & BRO., Norfolk, Va.

# VIGILANT

Two Hole or Double Spout Sheller  
WITH COLD ROLLED STEEL SHAFTS.

ADAPTED FOR HAND OR POWER.

Separates the Corn from the Cob. Cleans the Corn. Has a capacity of thirty-five to forty-five bushels per hour, and admirably adapted for use in Grist Mills, and for Farmers who are supplied with power, as well as for use by hand.

Frame made of Hard Wood, Handsomely Striped and Finished, and secured with Joint Bolts. Is Larger and Stronger, has Heavier Shafts and Gearing than other Shellers of similar construction, increasing capacity and durability. Is always furnished with crank for hand and pulley for power, and Fan and Feed Table as shown in illustration.

Price, as Illustrated, \$18.75.

Manufactured by S. R. WHITE & BRO., Norfolk, Va.
