CORPORATION
MT. AIRY, N. C.

MR/MANUFACTURER

BOUT NORTH CAROLINA GRANITE CORPORATION

North Carolina Granite Corporation's principal quarry in Mt. Airy is the largest open-faced quarry in the world, and is the world leader in supplying the highest quality white granite. The deposit is free of vertical cracks and natural bed planes, and granite quarried today is guaranteed a perfect match for granite taken 100 years ago or granite quarried hundreds of years from now.

In addition to our Mount Airy granite quarry shown above, we quarry Cedar Rose in Concord, North Carolina and Pink Kershaw in Kershaw County, South Carolina, plus an array of other granite colors.

We have the most up-to-date processing equipment, including multi-blade saws, diamond cutoff saws for jointing, slotter saws for anchor slots, and an automatic burning machine, plus automatic equipment for kerfs, quirks and precast or bolt anchor holes. Our design and drafting department and company representatives will be pleased to furnish you with technical information, samples, and details regarding the most economical and practical uses of granite for your individual designs.

With over a century of experience in quarrying and fabrication, North Carolina Granite Corporation has the ability and expertise to see that your ideas become picture perfect realities in one of the most enduring natural materials known to man...GRANITE.
