

DUKE POWER COMPANY

MOUNT AIRY BRANCH

MOUNT AIRY, N. C.

GENERAL OFFICE
CHARLOTTE, N. C.

May 1955

Dear Customer:

We are very anxious to make it as convenient as possible for our customers to pay their bills, and to check the increasing cost of reading meters and billing accounts, so that we may continue to supply you with electric service at the lowest cost. As a further effort in this direction, we are starting a new plan of rendering electric service bills to residential customers and to small commercial customers. In the future you will receive only one bill every two months, and that bill will cover electricity which you used during the two previous months.

You will receive your next bill about two months from the date of the enclosed bill. We believe you will like this new plan of paying your electric service bill every two months.

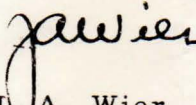

Regardless of the fact that you will only receive a bill for electric service every two months, you may continue to pay for this electric service monthly if you so desire. We will accept payment, in any amount, on service which you will have already used but for which you have not been billed during any particular month. Payments made in this manner will be credited to your account and you will be furnished a receipt for each payment. These payments will also be shown as credits on the succeeding bill, and the balance will be due within ten days from the date of this bill, as has been our normal procedure.

If you have purchased merchandise on the installment plan, you will receive a statement from us each month reminding you that the installments should be paid monthly, regardless of whether or not you receive a bill for electric service during that month.

The enclosed bill should be paid within ten days of date shown thereon.

We trust that this new arrangement will be entirely satisfactory to you, and that we can count on your cooperation as we have in the past.

Yours very truly,

J. A. Wier,
Manager
