According to a deed copy brought in by Pete Carroll of the Copeland Community, the boundary line between Stokes and Surry was changed in 1895 as follows:

We the undersigned Gaston A. Carroll on the part of Stokes County and John L. Worth on the part of Surry County under an act of the General Assembly providing for the survey and establishment of the dividing line between the said counties of Stokes and Surry having been selected by the commissioners of our respective counties to establish said line do make and report the following: We began at a stake in the supposed Virginia line, about thirty yards north of the old creek run of Archies Creek and runs south (3) three degrees and (15) fifteen minutes west crossing said old run and also crossing what is known as an Island between the old run and the new run or present creek way and thence continuing and crossing said Archies Creek three times and continuing on the same course and passing by or near several traditional points to a bunch of chestnut oaks Dalton Gordon's corner on east side of Black Mountain and beside the road running up to the top of said mountain, thence south (2) two degrees and (20) minutes west falling on several lines and points of the reported old line and crossing the N.W.N.C.R.R. at the 52nd mile post, a short distance below the Little Yadkin thence continuing same course to the bank of the Big Yadkin River. There was no deed made in the record of the old line, but we find that there was an actual bend in the traditional line of the above stated (55) fifty-five minutes. The present survey was, no doubt, made with a much more correct instrument and this may account for the crook. We marked the line well through all the timber we passed and drove up stakes at road crossings so that there would be no more trouble soon as to the exact location. Our survey put Henry Crouse and Isaac Hunt in Stokes

County both of whom have heretofore been reputed in Surry County. No other citizenship was changed. All of which we respectfully submit. December 20, 1895.
