

Vol. 1 - No. 9

Chatham Manufacturing and Northern Chatham Bedding, Elkin, North Carolina 28621

October 9, 1989

1989-90 C-I Company Team

The new Chatham-I Company Team members: First row - Arvil Swaim, Wet Finish; Joe Wood, Winding; Merrill Reavis, Yarn Manufacturing - Boonville; Jimmy Layell, Cloth. Second row - Freddie Gwyn, Technical Maintenance; Peggy Lyon, Burling; Mike Edwards, Engineering; Donnie Ford, Weave. Third row - Roy Penley, Dye House; David Wilmoth, Carding; Charles Durham, Warp; Phillip Flippen, Extrusion.

Then and Now Guess Who

This seven year old works in the Burling Department.

(Answer on Page Eight)

Share-A-Joke

How to Know You Are Aging

Everything hurts and what doesn't hurt doesn't work.

The gleam in your eye is from the sun hitting your bifocals.

You feel like the night before and you haven't been anywhere.

Your little black book contains only names ending in M.D.

You get winded playing cards.

You join a health club and don't go.

You know all the answers, but nobody asks you the questions.

You look forward to a dull evening.

You need glasses to find your glasses.

You turn out the lights for economic rather than roman-

tic reasons.
You sit in a rocking chair

and can't get it going.
Your knees buckle but your

belt won't.

Your back goes out more than you do.

You have too much room in the house and not enough in the medicine chest.

You sink your teeth in a steak and they stay there.

YOU WONDER WHY MORE PEOPLE DON'T USE THIS SIZE PRINT.

Vickie Collects Cups

Victoria Lyon

The collecting of cups and mugs for a hobby came about almost by accident for Vickie Lyon.

Vickie always liked cups and mugs and after picking them up at different places she had visited, she realized that she was getting too many to just store them in the kitchen cabinets. So the solution was to start hanging them on the wall and turn the cups into a collecting hobby.

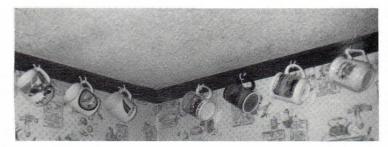

Over the years she has received many cups as gifts from family members and friends. There's a whole row of ''mother, mom, and grandmom' mugs, which were gifts from her children, Jolene Johnson and Chris Lyon, and two grand-children, Melanie (14) and Adam (9).

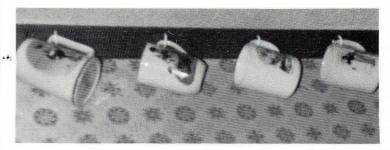

The cups from her travels and souvenirs brought back from trips by friends include twelve from Mexico, two from Canada, and twentyeight from different states.

The last time Vickie counted, she had 136 cups. If you visit her home, the cup and mug collection will be the first thing you notice.

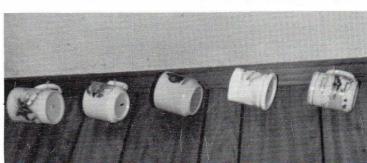

They are displayed along the molding around the top of her kitchen, around the top of the dining room, and now she has started them down her hallway.

Vickie has been employed at Chatham for twenty-four years. She and her husband, Herman, live in Traphill. Vickie is the sister of Benny Luffman (Piece Dye Lab) and

This is just a sample of the many cups Vickie has collected.

Kenneth Luffman (Dye House). Both their parents were retirees of Chatham, the late Claude and Ina Luffman. Vickie is employed first shift in the Cloth Department.

"I leave it this way because leaving it this way is a labor-saving device."

Misuse of air hose can cause injury

C-I Team at work - Freddie Gwyn, technical maintenance employee, shows how the air hose is used to blow lint from the spinning machines. Freddie is an overhauler first class who is a C-I team member. His concern about the danger of removing the air flow nozzle was first voiced at an engineering area C-I meeting.

Why is there a safety nozzle on the end of all Chatham air hoses? Maybe you don't know the answer to that question because it seems that some Chatham employees remove the safety nozzle when using the air hoses.

"But there isn't enough air coming out the nozzle to clean the lint from my machines" is the most popular answer as to why the nozzles are so frequently removed.

"Not so" says Technical Maintenance Department Head Larry Slawter. "The reason most people get less air pressure with the nozzles left on is simply because they hold the air hose nozzle too close to the machine or whatever they are trying to clean."

Most Chatham employees are familiar with our air hose system. The system is designed to make use of air pressure for blowing lint and dirt from machinery, the floor, etc.

This illustration shows the way air flows into the air hose. At the tip of the nozzle, the standard 70 pounds of pressure emerges from the tip, if the air flow is not restricted. If you keep any object at least two feet away from the end of the nozzle, you will get 70 pounds of pressure without removing the tip, and keep OSHA standards at the same time.

On the end of each of our air hoses we have a nozzle. The nozzle has air by-passes which allow the air to flow out holes at the side of the nozzle when the air flow is restricted at the end of the hose. The nozzles are a required piece of equipment, required by OSHA (Occupational Safety and Health Act) for the safety of employees. OSHA regulations are for your safety.

The reason the safety nozzle is required? Because air coming out of the hose at such a high pressure can be a safety hazard.

Say you took the safety nozzle off the air hose and you

The air flow safety nozzle - don't hold it this close and don't remove the nozzle.

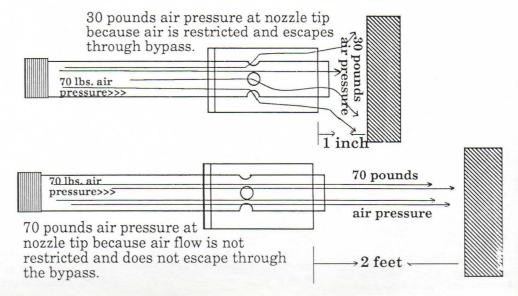

have cleaned the machine and the floor around the machine. You have yarn lint in your hair and on your clothes, so you decide to use the hose on yourself. Air flow coming out a hose at 70 pounds pressure, which is the amount of pressure we have, can shoot air under your skin just as surely as if a hypodermic needle were used to put it there.

Air under the skin can actually be deadly, and short of that, can cause all sorts of medical problems that we don't want any of our employees having. The 70 pounds of pressure used so close to your body is also a good way to blow foreign objects into your eyes.

We're showing you in the sketch below just how to get the pressure you need for cleaning and eliminate any dangers to yourself. If 70 pounds is needed for cleaning, 70 pounds is what you get if you use the air hose correctly. If you hold the nozzle at least two feet away from the item you are cleaning, you get 70 pounds of pressure.

If the air coming from the air hose is hitting an object closer than two feet, then the air moves outward to the sides through the small air holes around the inside of the nozzle (see illustration) instead of moving straight ahead. This causes the pressure to be reduced.

Remember, the OSHA regulations are for your protection. We are actually breaking the law when we remove the nozzles trying to get more pressure from the air hoses. We encourage you to learn to use the air hose correctly and leave the nozzle on the hose.

BIG AUCTION SALE: Saturday, October 21 - 10:00 a.m. on Highway 21 North, State Road, across from Della's Bake Shop - beside old Wagon Wheel Restaurant building at the home of James C. Hanks. Household items, tools and many more items. For more information call 366-2726 between 7 p.m. and 10:00 p.m.

C-NC Cuisine

Howard Reynolds

Ruth Overcash

Howard Reynolds brought this 100 year old recipe to share. He and his wife, Ruby, got the recipe from his sister, Leona Burcham, who got it from her mother-in-law.

Since retiring last year, Howard has helped out, as needed, in the Chatham Print Shop.

Chow Chow

1 dozen green tomatoes 1 dozen red pepper

1 dozen green pepper

2 large onions

1 cabbage

6 strong peppers

3 heaping tablespoons salt

3 cups sugar

Spices, vinegar to cover

First remove seeds from pepper and then grind or chop all the ingredients. Stir in salt, add boiling water, let stand 10 minutes. Drain and add vinegar, sugar, and spices and cook 30 minutes, stirring often to keep from sticking. You may want to add more sugar and more strong pepper.

Ruth Overcash sent us this delicious sounding Apple Butter Pound Cake recipe.

Ruth is a retired employee and is a member of the Fellowship Club and the L.H.C. Club No. 1. She and her husband, Mack, live on Woodruff St.

Apple Butter Pound Cake

2 cups all purpose flour

1 cup self-rising cornmeal 2 teaspoons baking powder

1 teaspoons cinnamon

2 cups apple butter

1 teaspoon vanilla

1½ cups granulated sugar

1 stick margarine, softened

1 (8 oz.) package cream cheese, softened

2 eggs

1 cup buttermilk

1 cup chopped pecans

Heat oven to 350 degrees. Grease and flour a 10-inch tube pan. Combine flour, corn meal, baking powder, and cinnamon. In separate bowl combine apple butter and vanilla. In large mixing bowl beat sugar, margarine and cream cheese until light and fluffy. Add eggs one at a time mixing at low speed. Add apple butter and vanilla. Alternating flour, cornmeal, baking powder and cinnamon with buttermilk, mix well on low speed. Fold in pecans. Spoon evenly into prepared pan. Bake 60 to 70 minutes or until done.

Glaze

1 cup powdered sugar 4 or 5 teaspoons sweet milk 1½ teaspoons corn syrup ¼ teaspoon vanilla

Drizzle over warm cake. Store cake tightly covered. C-NC NEWS

Retiring -

Lucille Storie got a surprise gift at her retirement party.

Lucille Storie has done lots of sewing. She enjoys reading, especially novels and westerns. But now she has something new to learn because her children surprised her at her retirement party with a new VCR. She has never owned one but says she will just have to learn how to use it.

Lucille's children are Sandra Owen, Carmin Brown and Brad Storie and she also has six grandchildren.

Lucille says she used to travel a good bit with her late husband, Burl Storie, who played and managed AA baseball. She hasn't traveled much lately, but plans to take a few trips now that she has retired. She is interested in seeing lots of the U.S.

Lucille is retiring from the Sample Department where she has worked since 1981. She has been employed at Chatham for almost twenty-two years.

An optimist is a person who starts a new diet on Christmas Day...

We've had a request for a good homemade molasses cookie recipe. So, if anybody has one, submit it to the C-NC NEWS.

Rick Snow, supervisor of Yarn Finishing, presented a gift to Clarence Dowell, who is retiring from the Chatham plant in Boonville.

Bessie Harp, who is retiring from the Binding Department, enjoyed a special visit from some of her fellow employees. Her husband Ellis watches as Ruth Davis (Binding) presents Bessie with a gift from the Binding Department.

Childhood Vaccination

Polio, diptheria, tetanus, and many other serious childhood diseases are distant concerns for most of us. Vaccines have almost banished them from the American bloodstream. By continuing to immunize our children to these diseases, we can keep it that way.

You can learn about immunizing your children against eight diseases--how the vaccines work, when they work best, and what the few side effects are--by reading the Department of Health and Human Services' Booklet, **Parents Guide to Childhood Immunization** (Item 166V, \$1.25). To get your copy, just send your name, address, along with the

item number and \$1.25 to R.

Woods, Consumer Information Center, Pueblo, Colorado 81009.

Babies are born immune to many diseases because they've received antibodies from their mothers' bloodstream. But this immunity wears off during the first year of life. To build it back up, weakened or killed disease-causing organisms are made into vaccines. Done properly with periodic booster shots, vaccination can guard against disease a lifetime.

Vaccination has eliminated many diseases from our lives. Getting your children vaccinated against the eight childhood diseases will help keep the occurance of these diseases at a minimum. Clarence Dowell has a long list of things to do to keep busy including painting his house and taking a trip next summer.

"There's a long list to catch up on," said Clarence, "but if my health stays good, I will probably come back here and work some next year."

The trip he plans is to California to see his only living aunt and Clarence is looking forward to going.

Clarence and his wife, Lala, have five children: James, Edwin, Pearl, Clarence, Jr. and Karen Gray. Karen works in our Research lab and James works in our Weave Department.

Clarence and Lala live in Roaring River where they attend the Poplar Springs Baptist Church. Clarence is retiring from the Yarn Finishing Department at the Boonville Plant.

Joseph Holbrook Retires

Joseph Holbrook has been at the Fiberwoven Plant for about ten years and has been employed at Chatham for thirteen years.

He has three children: Jimmy, Sherry and Michael and seven grandchildren. He hopes to see more of them and has big plans to go to Jacksonville, Florida to visit his three nephews who live there. They have promised to take him deep-sea fishing.

Joseph also enjoys golf and fresh water fishing.

Softball Plant Champions

Tournament Winners

Rollers - First row (l-r) - Danny Collins, Jeff Newman, Bobby Wiles, Harold Swisher, Jimmy Hamby, Birt Holsclaw (coach). Second row (l-r) - Larry Tuttle, Rodney Wilmoth, Wayne Luffman, Mack Hinson, Tony Sales, Lee Lyon. Third row (l-r) - Roger Jenkins, Darren Dobson, Donald Holsclaw. Bat Boy (kneeling) Travis Jenkins. The Rollers were also the Recreation Dept. Tournament Champions.

Runners-Up

Raiders - First row (l-r) - William Vestal, Mark Mitchell (coach), Jeff Foster, Jeff Dobson. Second row (l-r)-Marty Bruce, Dale Hughes, Dennis Bryant, David Rogers, Tony Cockerham. Not pictured - Raymond Day, Alvin Sales.

Apologies to Lousine

In the last issue we ran a photo of the wedding of Lousine Hemric's granddaughter, Debbie Durham, and we left Lousine's name out of the information given. We offer our apologies to Lousine (retired) and Debbie (Research Lab).

FLU VACCINE

Flu vaccine will be given in the First Aid on the following schedule:

Thursday, November 2 - 9 a.m. - 12 noon Thursday, November 9 - 12 p.m. - 4 p.m.

They will be given at the Boonville Plant on Thursday, November 2 from 1 p.m. - 2 p.m.

The charge this year will be \$6.00 to cover the cost of the vaccine. If you have had a reaction to the vaccine in the past or you are allergic to eggs, **DO NOT TAKE THIS VACCINE**.
